Content

- ① Translated letter on reverse of envelope  
entitled L. Cooper, 5935 Spruce St. Photo
- ② translated letter dated June? —, ~~Wrote~~  
Harcourt ~~from~~ addressed Dear Tom  
and signed 'Perc'
- ③ Translated letter dated Wed 5pm signed  
'Gamer'
- ④ Translated letter dated 6/6/50 to Dear  
Tom
- ⑤ news clipping re death of Prof. Leonor  
Michaelis
- ⑥ portion of envelope bearing address:  
367 miles ave.  
Bklyn 7, N.Y.
- ⑦ National Geographic map of Africa & Arabian  
Peninsula.

Disposition:

retain until case closed.

Other data may be obtained from  
stamp on envelope

# LEONOR MICHAELIS, SCIENTIST, 74, DEAD

Retired Member of Rockefeller  
Institute for Research Was  
Noted Physical Chemist

Dr. Leonor Michaelis of 325 East Seventy-ninth Street, member emeritus of the Rockefeller Institute for Medical Research, an outstanding physical chemist, died on Saturday of a heart ailment at the New York Hospital.

His discovery of normal active industry is said to have been based on his studies of the conversion of keratin (a protein of hair, feathers, etc.) to a soluble material using thio glycolic acid, although Dr. Michaelis did not patent his discovery and received neither recognition nor money for it.

His most recent work was the discovery of the radical of Vitamin E, the anti-sterility factor. Scientists said that this discovery might prove to be basic to an understanding of the action of this vitamin.

In 1945 he discovered ferritin, a liver substance, which studies at Cornell University Medical College and the New York Hospital revealed was one of the substances that act as a "balance wheel" to maintain normal blood circulation, and sheds new light on high blood pressure.

## Discovery on Electrons

In 1937 Dr. Michaelis announced the discovery of organic chemical reactions in which electrons travel singly instead of in pairs, as organic chemists had believed. The discovery threw into discard traditional conceptions of the molecular structure of coloring matter found in certain bacilli, enzymes and organic dyes, scientists then said.

Born in Berlin, Dr. Michaelis entered the University of Berlin in 1923. While a student he spent his free time composing music and working in the laboratory with Prof. Oskar Hertwig. His first paper in 1897 was on the problem of whether the point at which the sperm fertilized the egg determined the first cleavage furrow. This paper was in the negative.

He later published a paper on the effect of light on the secretion of the parathyroid gland, a medical discovery.

PROF. LEONOR MICHAELIS

on a prize. At this time he wrote a book on embryology for students, which went to nations.

In Berlin his work came to the attention of Paul Ehrlich, who offered him a post as his private assistant. There Dr. Michaelis studied histological staining properties of various new dyes, which were being elaborated by the German chemical dye industry. He discovered the specific vital stain effect of Janus green on certain cytoplasmic bodies that were to become known as mitochondria.

## Bacteriologist in Berlin

Next, for a few years, he worked on the transplantation of the mouse embryo, finding that the susceptibility for cancer transplantation depended on the particular strain. He also found a marked change in the immunological specificity of serum albumin when digested for a very short time with pepsin.

In 1905 he became bacteriologist at the municipal hospital in Berlin. In cooperation with Peter Rona, he undertook problems in the newly developing field of physical chemistry, which was to be his main life work.

The work was frowned upon by the hospital director who could not see the relation to the cause and cure of disease of studies on such problems as hydrogen ion concentration in relation to enzymic activity, the early basic studies on electrophoresis of proteins, the Michaelis-Menten theory for enzyme affinity for substrate, and the problems of adsorption of dyestuffs.

In later years, however, scientists acknowledged that these studies formed integral parts of the framework of our knowledge of enzyme action and protein behavior.

In these studies Dr. Michaelis found it necessary to learn more mathematics, which resulted in his book on mathematics for biologists and chemists, published in 1912. Two years later appeared his book on hydrogen-ion concentration, which was to become a classic in the field of physical chemistry.

## Visiting Professor in Japan

In 1922 he became visiting professor in biochemistry to the medical school of Nagoya, Japan. In his three years there he began the studies on permeability with artificial membranes specifically permeable to positive ions.

In 1926 he went to Johns Hopkins University as resident lecturer, and three years later he was named a member of the Rockefeller Institute.

His research in America included the processes of oxidation and reduction, with the fundamental discovery of stable organic radicals in aqueous solution, and with the development of the theory of single electron changes in biological oxidations.

Dr. Michaelis' manual of physical chemistry and his book on oxidation-reduction potentials have been translated into many languages and have run into many editions.

In 1940 he retired because of his age, but he continued his research work until shortly before his death. He was an accomplished amateur pianist and composer.

Surviving are his widow, the former Hedwig Jacoby, two daughters, Mrs. Walter Jacoby and Mrs. Dr. Wolfram Jacoby, and grandchildren, Sylvia and Stephen Jacoby.

A funeral service will be held in the Campbell funeral church, Madison Avenue and Eighty-first Street, tomorrow at 2 P. M.

At the Rockefeller Institute it was said, in a tribute yesterday: "In his passing, Science has lost an outstanding investigator and a great teacher."

Description:

Log of interview with Thos L Black  
in room 515, June 22, 50.

File No 65-4332-1B-1(21)

6-22-60

65-4300

page 1

6<sup>25</sup><sub>PM</sub> Black arrives in Bureau office reception room.

6<sup>31</sup><sub>PM</sub> SAs Wm B. Welte & Robt W. Holmes return to Bureau office, meet Black in reception room and go to room 513. Glass ice water provided for Black.

6<sup>42</sup><sub>PM</sub> Stenographer Mary Hooney enters and interview resumes from previous evening.

8<sup>10</sup><sub>PM</sub> Black gives lemon life saving SA Welte.

8<sup>40</sup><sub>PM</sub> Stenographer Hooney leaves & is replaced by Stenographer Malley. Recess.

8<sup>46</sup><sub>PM</sub> Interview resumes with her, Malley as stenographer.

9<sup>00</sup><sub>PM</sub> SA Holmes puts shade on over head light, reducing glare.

9<sup>52</sup><sub>PM</sub> Black says he's just about exhausted & will finish present trend, then stop.

10<sup>00</sup><sub>PM</sub> Interview ended, her Malley leaves.

10<sup>05</sup><sub>PM</sub> Black leaves office.

SECRETARY

X  
apb mts - no records in mtg book  
both written copies  
65-43325-1271 (26)

Water Blues 6/20/80

new section  
worked with 1st No. 10

1. Helles - Ford

2. Ford - Mary

3. Mary - Tom

4. Tom - John

5. John - the 1st in June

6. the 1st in June - the 1st in June

7. the 1st in June - the 1st in June

1. 2 y ago - Chem Ben Pant & Cola

Colman - stopped in once

or twice when he stopped here

worked part of D. B. B. B. B.

From 3 held 11 weeks 25,000

got some power when he came

from first by plane - had

also been in Europe 6 months

ago - Tom got some from Ben

● Heller introduced Black to  
Fred 12 yrs ago

Fred Thaghty & Heller were  
chem at Penn Sugar

B was best man at wedding  
of Heller & Heller

Heller introduced

2. Fred & D. to start lab when  
at Penn Sugar - saw Berg  
about consulting work for us  
they said they had fingerprint  
black at the University. T. & P. & L.  
Heller introduced

Thaghty & Fred to first meet  
Heller - in NY (Heller, Fred  
& C.)

3. Backlund 36 yrs. old. Black  
& S lived together in New York  
& worked together in Mexico

Heichel - lived with -

prior to war I went to work  
with Phil. Mosher in  
Fire Agency. Got B released  
from N.Y. & worked as  
conductor for Fire Agency  
at 3,000 /yr. B had lot  
of his own in Newark (during  
war)

He comes from Italy - & speaks  
he supports in Italy - owns  
lot of real prop. - lives in  
Newark suburbs - now  
building house in N.Y.

B & B on police committee  
when I go to N.Y. B was  
mentioned in Civil - never met  
anyone else in N.Y.

4. B said he is coming &  
great plan - we must get  
designed plans for govt & during  
war. This in Texas?  
rubber - gas & oil refinery  
designed & building

[ Both wanted to go Russia  
to set up vitamin machinery  
& send to govt. Saw B a lot  
of money. To go of 200 or 500  
thousand. Suppose you go  
black & white to set up to Russia  
ahead of time.

Two B's came to P. O. Hill  
to meet Russian friends  
in NY. Perry & I took him  
to N. Philly to go to NY  
Two O's went to NY

6 Mollner - Fine organ  
to clinical lab in R/  
rich - made out in last  
few years - rabbit test  
for ~~hypertension~~

born - wife & a Pils  
(Kungary)

[ Did not K work during  
war

Agasson came plant &  
H is outside ~~contaminated~~

He wanted blood to go back  
to work - B got it from  
for making ~~particular~~

(After drying - used for test on

B got 3, red out of it.

17. Chervat at Am Point &  
also at the various diff.  
from Hella - He killed  
Black eagle & some -  
were seen. Most know  
it he knows them -  
never said.

Black also other friends  
in Garry but never  
heard name - some from  
Nepes.

Did - surprised to hear  
about him - thought  
that he was - he would  
have done that.

Heck worked

{ Ann. P. Smith - N.Y.  
Soap factory - N.Y. or Jersey  
(Hoboken?) Town of  
factory  
Hoboken  
First begins  
Loc. of his own  
Beck Lot

mentioned for us speak  
isolated trip with Beck  
on business to N.Y.

Blotch used to live  
with Phentle before  
he lived with Gerald  
(on Kensington Ave 18700 block)  
He first lived at Majestic Hotel

[ Also had apt. Majestic 415th  
with a nurse - nurse was  
serving to Berg's mother-in-law
